

eConcept On-Line eCommerce Shopping Cart

The eConcept Shopping Cart system will allow you to sell your goods and services on-line 24/7, needing nothing more than a simple web browser, eg Internet Explorer, and a standard internet connection. With our system you can:

- e** Advertise and show all of your goods and stock that you have for sale with detailed descriptions and information
- e** Advertise and show a range of rental & hire services that you have available
- e** Use multiple pictures and descriptions for each product and service
- e** Trade and Retail accounts with storable Quotes and Order Histories
- e** Secure On-Line Ordering and Checkout system
- e** Automatic Delivery Costs Calculations
- e** Manufacturers Web Links
- e** 'Batteries included' - everything is supplied for you, ie a domain name, web and email hosting, no updating costs, **no contract** – you can even cancel at any time without penalties or cancellation costs – all inclusive in the price!
- e** Plus many more features to help you promote and sell your products and services 24/7

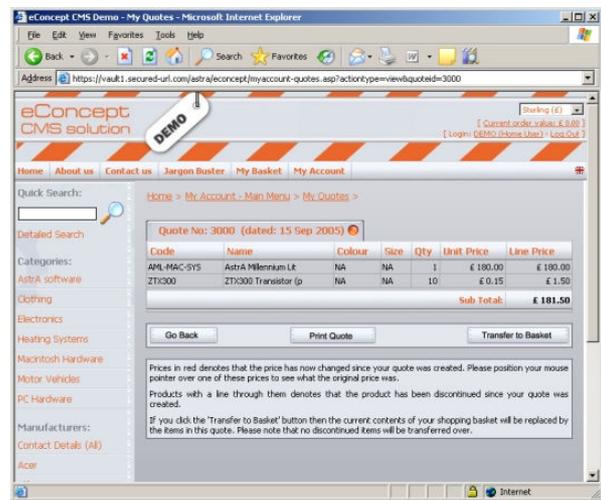

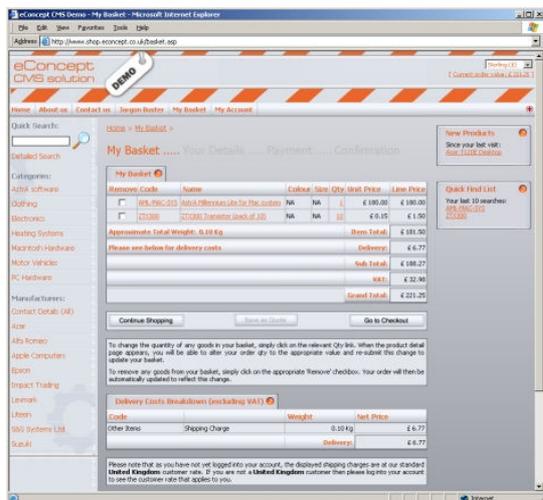

Once you have evaluated our system, we are convinced that you will be asking yourself:

- ?** Why pay more on another office with additional rents and rates when this system allows me to display my goods and services to anyone, anywhere in the country and the world?
- ?** Why pay for more advertising space when I can add as many items as I like into this system at no additional cost?
- ?** Why pay to bolt on an expensive 3rd party shopping cart system to my existing web site when this system will only cost me £10 + VAT a week and includes everything?

Order it now, but if you want to see more, just go on-line and visit www.eConcept.co.uk to see our demo, where you can see all the above features and more. Once you have seen the site and convinced yourself you should have your own eConcept Shopping Cart, give us a call and we will have your site up and running right away!

Please note that the site depicted in the above illustration is a live eConcept site
