

Estate Agents On-Line

The eConcept Property system will allow you to sell and let *your* properties on-line 24/7, needing nothing more than a simple web browser, eg Internet Explorer, and a standard internet connection. With our system you can:

- Advertise and show properties for sale or rent
- Display comprehensive on-line brochures which can be printed out
- Advertise house styles, eg detached, bungalow, etc
- Advertise locations & areas and your services
- Includes an optional on-line mortgage calculator
- Use multiple pictures and descriptions for each property
- Automatically display your property of the week
- Create personalised contacts of your staff
- Create news letters (bites) that automatically display and expire
- Your prospective client has powerful search facilities and 'wish lists' at their fingertips within the system so as to find their exact property
- 'Batteries included' - everything is supplied for you, ie a domain name, web and email hosting, no updating costs, **no contract** – you can even cancel at any time without penalties or cancellation costs – all inclusive in the price!
- Plus many more features to help you promote and sell your properties and services 24/7

Once you have evaluated our system, we are convinced that you will be asking yourself:

- Why pay more on another office with additional rents and rates when this system allows me to display my client properties to anyone, anywhere in the country and the world?
- Why pay for more local advertising space when I can add as many properties as I like into this system at no additional cost?
- Why pay to bolt on an expensive 3rd party system to my existing web site when this system will only cost me £12.50 + VAT a week?

Do you want to see more? Just go on-line and visit www.eConcept.co.uk to see our demo, where you can see all the above features and more. Once you have seen our site and convinced yourself you should have your own eConcept Property Shop, give us a call and we will have your site up and running right away!

Please note that the site 'www.willowproperties.co.uk' as depicted in the above illustration is a live eConcept site
